MADE IN  
THE USA

### Privacy Safelite Fire Rated Light Covers

#### UL Fire Rated Ceilings

Fire Rated Ceilings must have UL Approved Downlight Covers for all recessed and Florescent fixtures. Sound Isolation Company offers the most affordable option on the market; Privacy Safelite Fire Rated Light Covers. If the floor/ceiling has a 1 Hour Fire Rating, the light fixtures must be installed in a way that will NOT change the resistance. Approved in more than 50 UL Rated Ceiling Designs, Privacy Safelite Covers will meet or exceed the UL Fire requirements for your project.

#### Time Is Money

Typically UL Fire Rated ceiling material (ceiling tiles or drywall) is used to field fabricate enclosures for ceiling light fixture penetrations. This process is both costly and hard to perform on a consistent basis; Privacy Safelite Fire Rated Covers are a cost effective and quality control alternative. All Safelite covers arrive pre-cut and ready to assemble; typical installation time is less than 5 minutes per fixture. Conservative estimates at 15 Fixtures per hour will save you money on even the smallest job.

#### Flexibility

Privacy Safelite Fire Rated Light Covers are available to accommodate a variety of light fixture sizes: fluorescent fixtures 2' x 4', 2' x 2', recessed can or high hat style light fixtures and speaker boxes to satisfy re rated ceiling assembly details specified in UL listings and required by Building Code for various re rated construction assemblies. Custom sizes are available with lead times of only two weeks.

- UL Rated Light Covers will provide safety and soundproofing to your project, in one easy step.
- Low profile light covers for any fixtures, even custom sizes available in only two weeks.
