3 Reasons Why Your Sound Isolation Project Needs Resilmount

1. Unique Patented Isolation Element

With an eye-catching design and signature red color, Resilmount's patented thermoplastic element is engineered to outperform standard rubber moldings because of its column/node matrix structure. The unique, multi-cell one-piece isolation element was designed by Resilmount to eliminate acoustic short circuit between the room lining and the building structure, and to ensure the clip assembly remains intact during transit and installation.

2. Third Party Testing

Studco have conducted extensive third-party testing on our Resilmount isolation clips, including Riverbank, NGC and WEAL, to offer you peace of mind that our products will perform under the relevant conditions. Resilmount is backed by Studco's experienced technical team and can also assist with qualified opinions and acoustic advice on your project.
