

Resilmount A130R

Heavy Duty Sound Isolation Mounting Bracket

APPLICATION

Resilmount A130R is used as a heavy duty mount and acoustical isolation bracket. It is mounted between the wall and the structure that you are mounting.

FEATURES

- Engineered thermoplastic rubber outperforms standard rubber because of its sound absorbing characteristics.
- Supplied as a fully assembled component - manufactured under ISO9001 quality control system.
- Easy installation into new or existing wall systems.
- Suitably isolates the wall system from the structure to reduce structure and airborne noise.
- Designed to fit inside a 6 inch metal track.
- Wider flanges for easier screwing.

INSTALLATION NOTES

- All 3 rubbers must be screwed into the stud or framing.
- Metal track sits on top and must be screwed off a minimum of 4 times per clip.
- The A130R and track assembly is situated between the metal furring channel and A237R assembly.
- In ceiling applications, always check load ratings with Resilmount's engineers prior to installation.
- Acoustical Design Load: 110lbs

DYNAMIC CHARACTERISTICS

The Resilmount A130R is an engineered sound isolation clip used to reduce airborne and structure-borne vibration. The All Resilmount products are precision manufactured by Studco Building Systems for complete control over the quality of each individual piece, in order to meet or exceed the architectural specifications required of each resilient mount. The patented resilmount rubber insert has been independently tested and approved for use in the USA.
