

PRIVACY RECESSED LIGHT COVER SERIES

STOP NOISE LEAKS AND MEET THE FIRE CODE
FIT RESIDENTIAL AND COMMERCIAL FIXTURES
INSTALLATION IN MINUTES, NO FABRICATION

Installed Light Cover

The key to a successful soundproofing project is paying attention to the little things. Nothing is more problematic than holes in the sound envelope we have taken steps to create. Recessed lights and speakers are the most common holes in the soundproofing system.

Drop Ceiling (cut away)

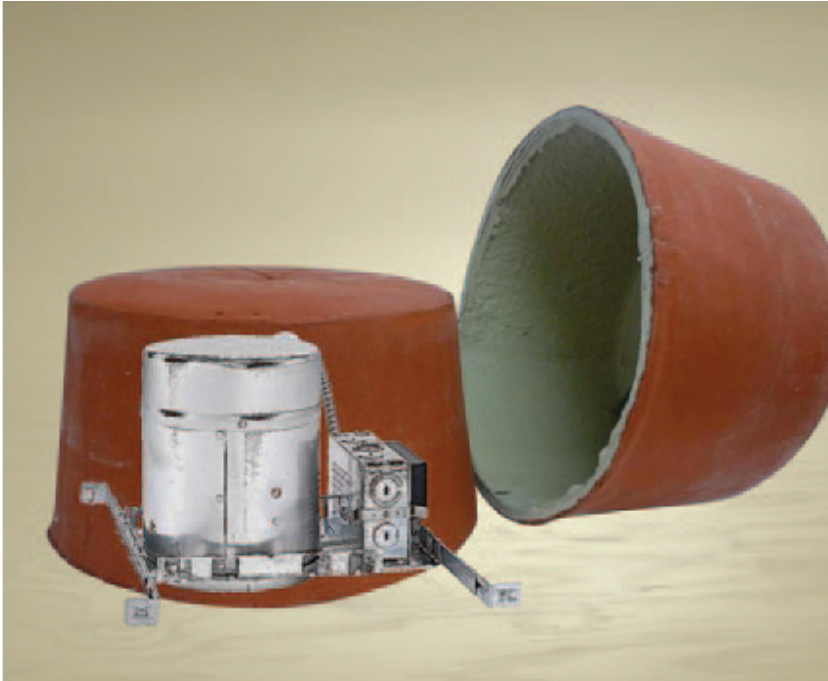

There's no question that can lights are a great way to provide lighting for a media room, living room or kitchen. Finally, there is a reliable, effective solution that is easy to install. Privacy Fire Rated Recessed Light Covers are the answer.

Results after fire

For residential and commercial noise problems the required fix may involve only correcting the shortcomings around lights, electrical outlets and switch boxes, or the doors. West Coast Sound Solutions has simple and effective solutions.

Please call us to discuss the little things before you move ahead with your project.

Privacy Recessed Light Covers

We have covers for both 6" and 8" recessed can lights available. For commercial applications we offer 2'x2' and 2'x4' models to accommodate fluorescent fixtures. Losing sound and heat through fixtures can be fixed all in one step.

One Hour Fire Rated Light Cover

PRLC-1 is an one hour rated cover for both 6" and 8" recessed lights. Meet the Fire Code and block noise in or out of the room in one step.

Two Hour Fire Rated Light Cover

PRLC-2 has a two hour fire rating where commercial requirements cannot be met with PRLC-1. Same easy installation and the same excellent noise control in one step.

Performance Light Covers

When a fire rating is not required we have a version of our covers that will provide the same benefits at a lower cost. Residential applications with blown insulation are typical with our Performance Light Covers.

With West Coast Sound Solutions you will get the help you need: expert design, product selection and installation instruction. We have the experience you need for a partnership that will work.

INSTALLATION INSTRUCTIONS

STEP 1

Select the right cover for your chosen fixture. Hanger bars of the light fixture shall be screwed to the joists in addition to the tabs being hammered into the joists, following the light manufacturer's installation instruction.

STEP 2

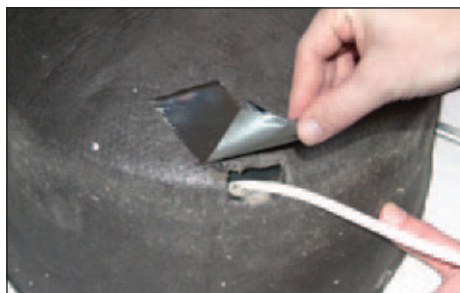

Place Privacy Recessed Light Cover over the fixture. Slit the cover to fit over the hanger bars of the fixture. Cut four slits with a size up to 1" max.

STEP 3

The wire can be fed through one of the cover holes located at the top. Follow the light manufacturer instructions to make proper connections.

Use foil tape over the all holes after wiring is completed.

STEP 4

Put the cover on top of the fixture. Check for secure fit, and make sure the cover overhangs the hanger bars. The Privacy Recessed Light Cover must fit flush with the back surface of the drywall board.

INSULATED CONTACT (IC) RATING:

COMMERCIAL: Building codes require a one hour fire rating for ceilings; some require two hour. Our light covers will meet the requirements with less expensive fixtures, saving you money.

RESIDENTIAL: When blown in insulation is used the light fixture must be IC rated; these fixtures exceed \$ 100 in cost. By using our light covers a much less expensive fixture can be used and the cover makes the fixture in compliance.
