

PRIVACY REPLACEMENT DUCT

REDUCE ROOM TO ROOM NOISE FROM
SHARED DUCTS IN OFFICES/PLANTS

REDUCE THEATER NOISE TO ADJACENT ROOMS

REDUCE FAN NOISE FROM LARGE HVAC UNITS

STOP FAN NOISE TRAVELING DOWN DUCTS

Length	5' standard (tip-to-tip)
Velocity	3000 FPM
Operating Temp	0-350° F
Working Pressure	20" WC + and -
Burst Pressure	40" WC
Metal Core	.0055" thick, AL 30003 - H111
Insulation	1.5" thick, .5 lb. density
R-Value	4.5

Construction Details:

Perforated Metal Core:

Constructed from one ply of perforated and corrugated aluminum with interlocked seams, folded flat and knurled for flexibility and strength.

Fiberglass Insulation Wrap:

The core is then completely wrapped with a blanket of fiberglass insulation.

PRIVACY REPLACEMENT DUCT

There are many applications where a silencer is not required. Typical occurrences are office top office noise in work environments. It not unusual with low cost office environments for the air space above a drop ceiling to open, not insulated, and for the ducts to be extremely lightweight. Voices from other offices or the hallway can easily migrate into the ducts and travel into your space.

In many cases we can reduce noise traveling through ducting by replacing a portion of the duct with Privacy Replacement Duct. These lightweight replacement sections are available 10' long, and are sized according to your existing ducts.

A perforated aluminum core is wrapped with a foil faced blanket of insulation to offer high R Value, and excellent noise reduction. Privacy duct is durable, easy to install, and will provide meaningful noise reduction in the voice ranges for all applications.
